INDEX TO VOLUME XLVII

ACACIA method for determining blood volume, 302.

Adrenalin, effect of, on blood pressure, 286.

——, —— ——, —— muscular fatigue, 178, 185.

Aerotonometer, a new form of, 137.

——, the lung as an, 143.

Alkali administration and lactic acid in urine, 189.

ALVAREZ, W. C. and E. STARKWEATHER.
XIV. Differences in the catalase content of muscle from different parts of the stomach, 60.
XV. The catalase content of the mucous membrane from different parts of the digestive tract, 67.
XVII. The metabolic gradient underlying colonic peristalsis, 293.

Amino-acids, effect of, on catalase, 351.

ANDERSON, C. E. See RIDDLE and ANDERSON, 92.

ATWELL, W. J. and C. J. MARINUS. A comparison of the activity of extracts of the pars tuberalis with extracts of other regions of the ox pituitary, 76.

AUER, J. and S. J. MELTZER. The blood-pressure curve following an intraspinal injection of adrenalin, 286.

BLOOD coagulation: heparin and pro-antithrombin, 328.

—— count during digestion, 399.

——, effect of secretin injections on, 342.

——, factors controlling volume-flow of, 438.

Blood, method of determining volume-flow of, 428.

—— pressure, effect of adrenalin on, 286.

—— serum proteins, regeneration of, 356, 370, 379.

—— volume by acacia method, 302.

Brain of normal and ataxic pigeons, chemistry of, 124.

BUCKNER, G. D., R. H. WILKINS and J. H. KASTLE. The normal growth of White Leghorn chickens, 393.

BURGE, W. E. The influence of the ingestion of the amino-acids, adequate and inadequate proteins upon the production of catalase, 351.

—— and A. J. NEILL. Further study on the effect of food in increasing oxidation, 13.

BURTON-OPITZ, R. and R. DINEGAR. The viscosity of urine, 220.

CARBON dioxide, undissociated, significance of, in respiration, 43.

Catalase content of gastric muscle, 60.

—— —— —— mucous membrane of digestive tract, 67.

——, effect of amino-acids and proteins on, 351.

Cerebral cortex, chemical stimulation of, 283.

Chickens, normal growth of, 393.

CLARK, J. H. The photo-chemical effect of certain fluorescent substances on rennin, 251.

DIET, influence of, on protein regeneration, 370.

Digestion, blood count during, 399.

Digestive tract, catalase content of mucous membrane of, 67.

DINEGAR, R. See BURTON-OPITZ and DINEGAR, 220.
DOWNS, A. W. and N. B. EDDY. Secretin. IV. The number of red and white corpuscles in the circulating blood during digestion, 399.

ECK fistula and plasma depletion, effect of, on protein regeneration, 379.
EDDY, N. B. See DOWNS and EDDY, 399.
Egg yolk and egg albumen, effects of quinine on production of, 92.
Electrical deflections, 411.

FASTING, influence of, on protein regeneration, 356.
Fatigue, muscular, effect of adrenalin on, 178, 185.
Fluorescent substances, photo-chemical effect of, on rennin, 251.
FOSTER, J. P. See MANN and FOSTER, 278.
FUJIMOTO, B. The influence of secretin on the number of red and white corpuscles and the ferments and sugar content of the blood, 342.

GASSER, H. S. See MEEK and GASSER, 302.
Gastric muscle, catalase content of, 60.
GESELL, R. Studies on the submaxillary gland:
I. Electrical deflections in general, 411.
II. An automatic and bloodless method of recording the volume-flow of blood, 428.
III. Some factors controlling the volume-flow of blood, 438.
IV. A comparison of the effects of hemorrhage and of tissue-abuse in relation to secondary shock, 468.
V. An automatically filling and recording spirometer, 507.
GILLETT, L. H., L. WHEELER and A. B. YATES. Material lost in menstruation of healthy women, 25.
Growth, normal, of chickens, 393.
GRUBER, C. M. IX. The antagonistic action of epinephrin to the fatigue produced by the perfusion of acid sodium phosphate, 185.
—— and O. S. KRETSCHMER. VIII. The effect of adrenalin upon the fatigue produced by the injection of the fatigue products, lactic acid and acid potassium phosphate, 178.

HEART, beating, heat liberated by, 156.
Heat liberated by beating heart, 156.
Hemorrhage, effects of, on blood flow, 468.
Heparin and blood coagulation, 328.
HOLT, E. See HOWELL and HOLT, 328.
HOWELL, W. H. and E. HOLT. Two new factors in blood coagulation—heparin and pro-antithrombin, 328.
HURWITZ, S. H. See KERR, HURWITZ and WHIPPLE, 356, 370, 379.

IRWIN, M. The nature of sensory stimulation by salts, 265.

KASTLE, J. H. See BUCKNER, WILKINS and KASTLE, 393.
KERR, W. J., S. H. HURWITZ and G. H. WHIPPLE. Regeneration of blood serum proteins:
I. Influence of fasting upon curve of protein regeneration following plasma depletion, 356.
II. Influence of diet upon curve of protein regeneration following plasma depletion, 370.
III. Liver injury alone: liver injury and plasma depletion: the Eck fistula combined with plasma depletion, 379.
Kidney, action of pituitary extract on, 1.

KING, J. L. Possible periodic variations in the extent of the knee-jerk in women, 404.
KNAPP, H. J. See MACLEOD and KNAPP, 189.
Knee-jerk in women, periodic variations of, 404.
KNOWLTON, F. P. and A. C. SILVERMAN. The action of pituitary extract on the kidney, 1.
KOCH, M. L. and O. RIDDLE. The chemical composition of the brain of normal and ataxic (?) pigeons, 124.
KRETSCHMER, O. S. See GRUBER and KRETSCHMER, 178.

LACTIC acid, alkali administration and, in urine, 189.
LAKE, G. C. See VOEGTLIN and LAKE, 558.
LA MER, V. K. See RIDDLE and LA MER, 103.
Livery injury, effect of, on protein regeneration, 379.
——, secretory pressure of, 278.
Luminescence of Watasenia scintillans (Berry), 534.
LUND, E. J. Quantitative studies on intracellular respiration:
III. Relation of the state of nutrition of Paramecium to the rate of intracellular oxidation, 167.
IV. The rates of CO_2 production by starved and fed Paramecia, and their possible relation to the oxidation in the unfertilized and fertilized sea urchin's egg, 318.
Lung as an aerotonometer, 143.

MACLEOD, J. J. R. and H. J. KNAPP. The influence of alkali administration on the urinary excretion of lactic acid, and the possible significance of the latter in maintaining neutrality in the body, 189.
MANN, F. C. Studies on experimental surgical shock, 231.
MANN, F. C. and J. P. FOSTER. The secretory pressure of the liver with special reference to the presence or absence of a gall bladder, 278.
MARINUS, C. J. See ATWELL and MARINUS, 76.
MARTIN, E. G. and W. H. RICH. Muscular strength and muscular symmetry in human beings. II. In adult males, 29.
MAXWELL, S. S. Chemical stimulation of the cerebral cortex, 283.
MEEK, W. J. and H. S. GASSER. Blood volume. A method for its determination with data for dogs, cats and rabbits, 302.
MELTZER, S. J. See AUER and MELTZER, 286.
Menstruation of healthy women, material lost in, 25.
Mucous membrane of digestive tract, catalase content of, 67.
Muscle, gastric, catalase content of, 60.
Muscular strength and muscular symmetry in adult males, 29.

NEILL, A. J. See BURGE and NEILL, 13.
Nerve, irritability of, effect of osmotic pressure on, 512.
Nervous reflexes in traumatic shock, 208.

OSMOTIC pressure, effect of, on irritability of nerve, 512.
O'SULLIVAN, P. M. A new form of aerotonometer, 137.
——. The lung as an aerotonometer, 143.
Oxidation, effect of food in increasing, 13.

PARAMECIUM, intracellular respiration in, 167, 318.
Peristalsis, colonic, metabolic gradient of, 293.
Photo-chemical effect of fluorescent substances on rennin, 251.
Pigment, post-mortem, in pigmentless retinas and choroids, 103.

Pituitary extract, action of, on kidney, 1.
——, ox, activity of extracts of several parts of, 76.
Plasma depletion, liver injury and, effect of, on protein regeneration, 379.
Polyneuritis, experimental mammalian, produced by deficient diet, 558.
PORTER, E. L. Variations in irritability of the reflex arc. IV. Variations in flexion and crossed-extension thresholds in experimental traumatic shock, with coincident blood pressure changes, 208.
Pro-antithrombin and blood coagulation, 338.
Protein regeneration, influence of diet on, 370.
—— ——, —— —— fasting on, 356.
Proteins, effect of, on catalase, 351.

QUININE, effects of, on production of egg yolk and egg albumen, 92.

REFLEXES in traumatic shock, 208.
Rennin, photo-chemical effect of fluorescent substances on, 251.
Reproduction in birds, physiology of, 92.
Respiration, intracellular, in Paramecium, 167, 318.
——, significance of undissociated carbon dioxide in, 43.
RICH, W. H. See MARTIN and RICH, 29.
RIDDLE, O. See KOCH and RIDDLE, 124.
—— and C. E. ANDERSON. Studies on the physiology of reproduction in birds. VIII. The effects of quinine on the production of egg yolk and egg albumen, 92.
—— and V. K. LA MER. Post-mortem melanin pigment formation in pigmentless retinas and choroids of white ring-doves, 103.

SALTS, sensory stimulation by, 265.
SCOTT, R. W. The significance of undissociated carbon dioxide in respiration, 43.
Secretin in blood during digestion, 399.
—— injections, effect of, on blood, 342.
Sensory stimulation by salts, 265.
Shock, experimental surgical, 231.
——, traumatic, nervous reflexes in, 208.
SHŌJI, R. A physiological study on the luminescence of Watasenia scintillans (Berry), 534.
——. The effect of osmotic pressure on the excitability of the nerve, 512.
SILVERMAN, A. C. See KNOWLTON and SILVERMAN, 1.
SNYDER, C. D. On the heat liberated by the beating heart. Second communication, 156.
Spirometer, an automatically filling and recording, 507.
STARKWEATHER, E. See ALVAREZ and STARKWEATHER, 60, 67, 293.
Strength, muscular, and muscular symmetry in adult males, 29.
Submaxillary gland, 411, 428, 438, 468, 507.
Symmetry, muscular, muscular strength and, in adult males, 29.

TISSUE-ABUSE, effects of, on blood flow, 468.

URINE, viscosity of, 220.

VISCOSITY of urine, 220.
VOEGTLIN, C. and G. C. LAKE. Experimental mammalian polyneuritis produced by a deficient diet, 558.
Volume-flow of blood, factors controlling, 438.
—— —— ——, method of determining, 428.

WHEELER, L. See GILLETT, WHEELER and YATES, 25.
WHIPPLE, G. H. See KERR, HURWITZ and WHIPPLE, 356, 370, 379.
WILKINS, R. H. See BUCKNER, WILKINS and KASTLE, 393.

YATES, A. B. See GILLETT, WHEELER and YATES, 25.

THE AMERICAN JOURNAL OF PHYSIOLOGY

VOLUME XLVII

BALTIMORE, MD.
1918–1919

CONTENTS

No. 1. September 1, 1918

The Action of Pituitary Extract on the Kidney. *F. P. Knowlton and A. C. Silverman*..... 1

Further Study on the Effect of Food in Increasing Oxidation. *W. E. Burge and A. J. Neill*..... 13

Material Lost in Menstruation of Healthy Women. *L. H. Gillett, L. Wheeler and A. B. Yates*..... 25

Muscular Strength and Muscular Symmetry in Human Beings. II. In Adult Males. *E. G. Martin and W. H. Rich*..... 29

The Significance of Undissociated Carbon Dioxide in Respiration. *R. W. Scott*..... 43

XIV. Differences in the Catalase Content of Muscle from Different Parts of the Stomach. *Walter C. Alvarez and Esther Starkweather*... 60

XV. The Catalase Content of the Mucous Membrane from Different Parts of the Digestive Tract. *Walter C. Alvarez and Esther Starkweather*..... 67

A Comparison of the Activity of Extracts of the Pars Tuberalis with Extracts of Other Regions of the Ox Pituitary. *Wayne J. Atwell and Carleton J. Marinus*..... 76

Studies on the Physiology of Reproduction in Birds. VIII. The Effects of Quinine on the Production of Egg Yolk and Egg Albumen. *Oscar Riddle and Carl E. Anderson*..... 92

Post-Mortem Melanin Pigment Formation in Pigmentless Retinas and Choroids of White Ring-Doves. *Oscar Riddle and Victor K. La Mer*.. 103

The Chemical Composition of the Brain of Normal and Ataxic (?) Pigeons. *Mathilda L. Koch and Oscar Riddle*..... 124

A New Form of Aerotonometer. *Paul M. O'Sullivan*..... 137

The Lung as an Aerotonometer. *Paul M. O'Sullivan*..... 143

On the Heat Liberated by the Beating Heart. Second Communication. *Charles D. Snyder*..... 156

No. 2. November 1, 1918

Quantitative Studies on Intracellular Respiration. III. Relation of the State of Nutrition of Paramecium to the Rate of Intracellular Oxidation. *E. J. Lund*..... 167

VIII. The Effect of Adrenalin upon the Fatigue Produced by the Injection of the Fatigue Products, Lactic Acid and Acid Potassium Phosphate. *Charles M. Gruber and Otto S. Kretschmer*..... 178

335999

IX. The Antagonistic Action of Epinephrin to the Fatigue Produced by the Perfusion of Acid Sodium Phosphate. *Charles M. Gruber*.... 185

The Influence of Alkali Administration on the Urinary Excretion of Lactic Acid, and the Possible Significance of the Latter in Maintaining Neutrality in the Body. *J. J. R. Macleod and H. J. Knapp*..... 189

Variations in Irritability of the Reflex Arc. IV. Variations in Flexion and Crossed-Extension Thresholds in Experimental Traumatic Shock, with Coincident Blood Pressure Changes. *Eugene L. Porter*..... 208

The Viscosity of Urine. *R. Burton-Opitz and Robert Dinegar*..... 220

Studies on Experimental Surgical Shock. *F. C. Mann*..... 231

The Photo-Chemical Effect of Certain Fluorescent Substances on Rennin. *Janet Howell Clark*..... 251

The Nature of Sensory Stimulation by Salts. *Marian Irwin*..... 265

The Secretory Pressure of the Liver with Special Reference to the Presence or Absence of a Gall Bladder. *F. C. Mann and J. P. Foster*..... 278

No. 3. December 1, 1918

Chemical Stimulation of the Cerebral Cortex. *S. S. Maxwell*..... 283

The Blood-Pressure Curve Following an Intraspinal Injection of Adrenalin. *J. Auer and S. J. Meltzer*..... 286

XVII. The Metabolic Gradient Underlying Colonic Peristalsis. *Walter C. Alvarez and Esther Starkweather*..... 293

Blood Volume. A Method for Its Determination with Data for Dogs, Cats and Rabbits. *Walter J. Meek and Herbert S. Gasser*..... 302

Quantitative Studies on Intracellular Respiration. IV. The Rates of CO_2 Production by Starved and Fed Paramecia, and Their Possible Relation to the Rates of Oxidation in the Unfertilized and Fertilized Sea Urchin's Egg. *E. J. Lund*..... 318

Two New Factors in Blood Coagulation—Heparin and Pro-Antithrombin. *W. H. Howell and Emmett Holt*..... 328

The Influence of Secretin on the Number of Red and White Corpuscles and the Ferments and Sugar Content of the Blood. *B. Fujimoto*..... 342

The Influence of the Ingestion of the Amino-Acids, Adequate and Inadequate Proteins upon the Production of Catalase. *W. E. Burge*..... 351

Regeneration of Blood Serum Proteins. I. Influence of Fasting upon Curve of Protein Regeneration Following Plasma Depletion. *Wm. J. Kerr, S. H. Hurwitz and G. H. Whipple*..... 356

Regeneration of Blood Serum Proteins. II. Influence of Diet upon Curve of Protein Regeneration Following Plasma Depletion. *Wm. J. Kerr, S. H. Hurwitz and G. H. Whipple*..... 370

Regeneration of Blood Serum Proteins. III. Liver Injury Alone: Liver Injury and Plasma Depletion: The Eck Fistula Combined with Plasma Depletion. *Wm. J. Kerr, S. H. Hurwitz and G. H. Whipple*..... 379

The Normal Growth of White Leghorn Chickens. *G. Davis Buckner, R. H. Wilkins and Joseph H. Kastle*..... 393
Secretin. IV. The Number of Red and White Corpuscles in the Circulating Blood During Digestion. *Ardrey W. Downs and Nathan B. Eddy*..... 399
Possible Periodic Variations in the Extent of the Knee-Jerk in Women. *Jessie L. King*..... 404

No. 4. January 1, 1919

Studies on the Submaxillary Gland. I. Electrical Deflections in General. *Robert Gesell*..... 411
Studies on the Submaxillary Gland. II. An Automatic and Bloodless Method of Recording the Volume-Flow of Blood. *Robert Gesell*..... 428
Studies on the Submaxillary Gland. III. Some Factors Controlling the Volume-Flow of Blood. *Robert Gesell*..... 438
Studies on the Submaxillary Gland. IV. A Comparison of the Effects of Hemorrhage and of Tissue-Abuse in Relation to Secondary Shock. *Robert Gesell*..... 468
Studies on the Submaxillary Gland. V. An Automatically Filling and Recording Spirometer. *Robert Gesell*..... 507
The Effect of Osmotic Pressure on the Excitability of the Nerve. *Rinnosuke Shōji*..... 512
A Physiological Study on the Luminescence of Watasenia Scintillans (Berry). *Rinnosuke Shōji*..... 534
Experimental Mammalian Polyneuritis Produced by a Deficient Diet. *Carl Voegtlin and G. C. Lake*..... 558
Index..... 591
